

Med Ed Materials Virtual Donation Drive

Improving Health Literacy with Free Educational Materials for
Low Income and Uninsured Populations

Our Mission

The primary goal of Med Ed Materials is to increase health literacy levels for low income and uninsured populations. To accomplish this goal, Med Ed Materials produces and distributes evidence based healthcare materials with a target readership of low income and uninsured populations. Our core activities include:

- Producing high quality evidence based materials that are easy to understand and apply
- Creating materials with topics helpful for our target readership of low income and uninsured populations
- Posting materials to our website and our iOS app so that anyone may download and use them for free
- Partnering with clinics and businesses to distribute our materials
- Giving people interested in improving health literacy a platform to help enact meaningful change

Who We Are

Med Ed Materials is a registered 501c3 non-profit corporation in the state of Illinois. We are a small team dedicated to accomplishing the mission stated: to improve health literacy levels for low income and uninsured populations.

At the core of Med Ed Materials are our volunteers who follow standardized guidelines on poster creation. This ensures that posters are high quality and evidence based. Our volunteers come from various places around the country but all have the same goal in mind: to improve health literacy. Additionally, our board of directors is mostly made of healthcare professionals and works tirelessly to fulfill this goal.
