

WHY GET A TDAP VACCINE WHEN PREGNANT

- A TDAP booster protects your baby from a highly contagious disease called pertussis or "whooping cough".
- Whooping cough is on the rise in the US and causes severe coughing and difficulty breathing. It can be lethal to newborns.
- When a mom gets a TDAP vaccine she makes antibodies that her baby can use to protect itself.
- Getting a TDAP booster is proven safe and effective during pregnancy. It protects your baby when they are most vulnerable.
